

DI BLASI TRAVEL MOBILITY SCOOTER

The Di Blasi (mod. R30) is a scooter powered by an electric motor. It can be folded or unfolded fully automatically: just press a button to fold to the size of a suitcase, just press another button to let it return to normal scooter, immediately ready to run.

When unfolded, it offers a comfortable seat and easy access; it is easy to drive: just turn the main switch and regulate the speed by turning the twist grip; can be driven also in narrow areas because its overall width is only 62 cm; it is handy because its turning radius is only 58 cm and it can go in reverse; can be driven even on unpaved roads thanks to its large 12.5 inch wheels; it easily climbs up to 12% slope; it has a range of 20 km.

When folded, its size is only 62 x 39 x 48(h) cm and therefore can be stored almost everywhere: in the boot of cars, of motor homes, in the elevator, in a small corner at home, etc. The weight (including the battery) is 24,9 kg; without battery (which can be removed or fitted in one second) the weight comes down to 22.1 kg.

Features:

- Simple fold/unfold of the scooter by the push of a button
- Lithium Ion battery, 20 Km Range
- 3 different colours available
- Large 12 1/2 x 2 1/4 tyres
- Luggage wheels and handle for easy transport when folded
- Weight Capacity of 100 Kg
- Small Compact size for storage of only 65 (l) x 42 (w) x 55 (h) cm
- Small turning radius of 58 cm

Specifications:

Front Wheel	30.48 cm pneumatic
Rear Wheel	31.75 cm pneumatic
Turning Radius	125 cm
Dimensions	55(L)*65(W)*42(H) cm
Complete Weight	24.9 kg
Maximum load	100 kg
Battery (lithium)	24V/ 8.5AH(Lithium)*1 (standard)
Max Speed	8 km
Travel Distance up to	20 km
