

SOLAX MOBIE TRAVEL MOBILITY SCOOTER

The Mobie is the signature product of the Solax brand and what made Solax an instant success and leader in the mobility market. Although the design has been improved since it's release in 1993, the main design principles such as ease of use, safety, portability and quality are stronger than ever.

An easy under-seat folding mechanism allows for easy folding and unfolding. The padded seat, adjustable tiller and flip-up removable armrests make the Mobie a truly fun and comfortable scooter. Like the entire Solax Travel range the Mobie is perfect for any travel, be it by train, car or plane.

Features:

An easy under-seat folding mechanism allows for easy folding and unfolding.
