

## ***SOLAX TRANSFORMER TRAVEL MOBILITY SCOOTER***

The Solax Transformer Soft-Tail is the new version of the Solax Transformer. It offers the same features as the Solax Genie Plus with a few additional comfort features.

Most notable the rear-suspension system, which allows for additional comfort when travelling on uneven foot-paths or for users that suffer from backpain. The angled front footplates have an anti-slip coating, allowing for more legroom and more grip for the feet while travelling. This can be especially useful for users that don't have much feeling or movement in their legs/feet, helping to keep the feet from flipping off the baseplate and interfering with the front wheels.

### **Features:**

- Rear Suspension for more comfort
- Automatic Folding with manual override
- Padded Seat with Removable flip-up armrests
- 27kg total weight
- Compatible with Solax Hoist
- Plane-safe Lithium Battery
- Puncture Proof tyres
- Multi-Grip delta handlebars
