

MICROLITE TRAVEL MOBILITY SCOOTER

A stunning design continues the tradition of innovation from our design team and was inspired by the need to provide safe and reliable portable transport far beyond what was thought possible. Achieving a staggeringly low weight means little if the performance is not equally impressive. Weighing only 18kgs the MicroLite ticks all the boxes for easy transportation, amazing indoor manoeuvrability and incredible outdoor performance.

Features:

The MicroLite weighing only 18kgs ticks all the boxes for being the most lite weight and portable scooter!

The three wheels make this scooter perfect for indoor activities with an excellent turning circle!
